PROFILE

Full Stack Developer with strong expertise in React.js and modern frontend development, alongside hands-on experience building scalable backend systems using Node.js and Express.js. Experienced in developing ride-hailing and delivery platforms, real-time applications, enterprise-grade admin dashboards, and RESTful APIs. Skilled in React, Next.js, Node.js, MongoDB, MySQL, and Socket.io, with a strong focus on performance, maintainability, clean architecture, and production-ready software development.

EXPERIENCE

Full Stack Developer — Nofal SEO *October 2025 – Present*

- Led backend development for ride-hailing applications using **Node.js, Express.js, and Socket.io**
- Translated business requirements into scalable system architecture and technical solutions
- Collaborated with **UI/UX and Flutter teams** to align application logic and ensure seamless integration
- Designed and delivered **RESTful APIs** for mobile applications
- Built and maintained **admin dashboards (EJS)** covering financial tracking, user management, and system operations
- Implemented real-time features including **live tracking, chat, and maps** using Socket.io
- Integrated payment gateways such as **Paymob and Stripe**
- Integrated third-party services including **Checkr (driver verification)** and **Twilio / SMS Misr (notifications)**
- Monitored and resolved production issues, improving performance and system stability

Full Stack MERN Developer — Meta Codex *May 2025 – September 2025*

- Built responsive and scalable **React.js** applications, reusable components, and admin dashboards integrated with **RESTful APIs**, developed modern frontend applications using React.js, Redux Toolkit, and API integration best practices.
- Designed and implemented scalable RESTful APIs and backend services
- Built and maintained multiple **admin dashboards** for different projects, including user management, analytics, and system operations
- Worked with both **NoSQL and relational databases**, designing efficient data models and queries
- Collaborated with cross-functional teams (UI/UX, frontend) to ensure seamless user experience
- Optimized application performance and enhanced system reliability
- Contributed to production deployments, debugging, and continuous improvement of live systems

EDUCATION

B.Sc. in Computer Science | Menoufia University, Faculty of Science 2019 – 2022
Grade: Good

INTERNSHIPS

Information Technology Institute (ITI) ___ Front-End & Cross-Platform Development

Nov 2024 – Apr 2025

- Completed intensive hands-on training in **React, Next.js, React Native, Flutter, and Node.js**
- Built scalable web and mobile applications using modern frameworks and state management techniques
- Developed **PWA and full-stack applications** using Firebase and MongoDB
- Collaborated in team projects, applying best practices in UI/UX, code quality, and version control

Creativa — .NET Full-Stack Development 2021 – 2022

- Developed web applications using .NET Core MVC and SQL Server
- Applied OOP principles and database design concepts
- Used Entity Framework and LINQ for data access and manipulation

SKILLS

• **Front-End**: HTML5, CSS3, SASS, Material-UI, Bootstrap, JavaScript (ES6+), TypeScript, React.js, Next.js, PWA

• **Mobile Development**: React Native, Flutter, Dart

• **Back-End**: Node.js, Express.js, RESTful APIs, Socket.io, Authentication (JWT)

• **Database**: MongoDB, MySQL, SQL Server, Firebase

• **Real-Time & Integrations**: Socket.io, Google Maps API, Paymob, Stripe, Twilio, SMS Misr, Checkr API

• **Version Control**: Git, GitHub

• **Testing & APIs**: Postman, RESTful API Integration, API Testing, Debugging, Performance Optimization

• **Others**: OOP, SOLID Principles, Data Structures & Algorithms, Design Patterns, Unit Testing, UI/UX

PROJECTS

Go Swyft – Multi-Country Ride-Hailing Platform (Egypt & USA)

Full Stack Developer (Backend & Admin Dashboard) ***Nofal SEO | 2025***

• Developed a ride-hailing platform serving Egypt and the United States (Maryland), delivering scalable backend services and RESTful APIs using Node.js, Express.js, and Socket.io.
• Built a multi-country admin dashboard with country-based data segregation for managing users, drivers, trips, financials, and reports.
• Implemented real-time trip tracking, driver monitoring, and in-app chat using Socket.io and Google Maps API.
• Integrated Stripe (USA) and Paymob (Egypt) payment gateways, supporting region-specific payment workflows.
• Integrated Checkr for automated driver verification, document validation, and approval workflows in the United States.

Tech Stack: Node.js, Express.js, Socket.io, EJS, MongoDB, Google Maps API, Stripe, Paymob, Checkr, JWT

Doghri – Multi-Service Mobility & Delivery Platform

Full Stack Developer (Backend & Admin Dashboard) ***Nofal SEO | 2025***

• Developed a platform combining ride-hailing and on-demand delivery services for restaurants, supermarkets, pharmacies, and beauty stores.
• Built scalable backend services, merchant portals, and dedicated dashboards for service providers to manage products, orders, and operations.
• Implemented real-time order dispatching and driver assignment based on location and availability.
• Integrated Paymob, wallet payments, and cash payment workflows with complete order and transaction tracking.
• Developed comprehensive admin modules for merchants, drivers, customers, financial operations, customer support, complaints, ratings, and analytics.

Tech Stack: Node.js, Express.js, Socket.io, EJS, MongoDB, Google Maps API, Paymob, JWT

Seda – Ride-Hailing Platform

Full Stack Developer (Backend & Admin Dashboard) ***Nofal SEO | 2025***

Developed backend services and RESTful APIs for Flutter mobile applications using Node.js, Express.js, and Socket.io.
• Built a full-featured admin dashboard for financial management, user operations, and platform monitoring.
• Implemented real-time trip tracking, driver-client communication, and live maps.
• Integrated Paymob payment gateway and wallet-based transactions.
• Developed driver verification, dynamic pricing, coupons, notifications, and financial management modules.

Tech Stack: Node.js, Express.js, Socket.io, EJS, MongoDB, Google Maps API, Paymob, JWT

CONCEPTS

• Data Structures & Algorithms
• Object-Oriented Programming (OOP)
• SOLID Design Principles
• Problem-Solving & Debugging

COURSES

• Mobile App Design in Figma | Udemy | 2025

• Node.js | MaharaTech | 2025

• Git & GitHub | Almdrash | 2024

• Freelancer (Mostaql, Upwork, Khamsat) | MaharaTech | 2024

LANGUAGES

• Arabic: Native
• English: Intermediate
